Art Unit: 2172:

DETAILED ACTION

1. This first office action is in response to the application filed on January 18, 2002, which claims 1-7 are presented for examination.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-4, drawn to an apparatus for access a database to retrieve at least one element in the memory resident data model, classified in class 707, subclass 104.

Group II. Claims 5-7, drawn to a method for initiating a software application for loading a design file using a parser, classified in class 717, subclass 101, 166.

3. The inventions are distinct, each from the other because of the following reasons:
Inventions I and II are related as sub-combination disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I have separate utility such as accessing a database to retrieve at least one element in the memory resident data model, while invention II is useable for initiating a software application for loading a design file using a parser. See M.P.E.P. § 806.05(d).

Art Unit: 2172:

4. These inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification. Restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and the search required for Group II is not required for Group I. Restriction for examination purposes as indicated is proper.

6. A telephone call was made to Todd A. Sullivan(Reg. No. 47,117) on October 30, 2003, to request an oral election to the above restriction requirement, but did not result in an election because Stephen could not be reached.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant also is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
